Cosmetic Bioglitter® SPARKLE METALLIC EFFECT GLITTERS

THE ORIGINAL GAME CHANGER

Cosmetic Bioglitter® SPARKLE products are **COSMETIC** grade glitter for use in loose and formulated cosmetic rinse-off, leave-on and make-up products.

These bright metallic effect glitters are indistinguishable from traditional plastic metallic glitter. Cosmetic Bioglitter® SPARKLE products, like all Bioglitter® products, are based on natural material and has been developed to biodegrade in the natural environment.

Cosmetic Bioglitter® SPARKLE is also industry award winning:

2017 – Gold award for innovation at ‘in-cosmetics global’.

2019 – Gold award in the ‘Green and Sustainability’ category in PCHI China

A new milestone!

Cosmetic Bioglitter® SPARKLE is now available in multiple versions as the Bioglitter® journey of development and innovation continues.

ECO CREDENTIALS

- Independently tested by OWS Belgium to ISO14851 / ISO14852 Fresh Water Biodegradability and proven to biodegrade highly in natural, fresh water environments
- TÜV Austria, ‘OK biodegradable WATER’ Certified
- Ethically and sustainably sourced raw materials

COSMETIC SENSORY

- Brilliant metallic effect
 - Indistinguishable from traditional plastic glitter
- Soft to touch

COSMETIC SAFETY

- Globally cosmetic compliant
 - EU, USA*, CHN, JPN, AUS, KOR, CAN
- Extremely low heavy metal content
 - <0.5 ppm Antimony (total content analysis)
- Allergen Free

OTHER BENEFITS

- Carmine/cochineal free
- Suitable for Vegetarians and Vegans

APPLICATIONS

- Dry
 - Water based
 - Oil based
 - Anhydrous based
 - Solvent based
- (see technical info for more detail, performance by product line can vary)

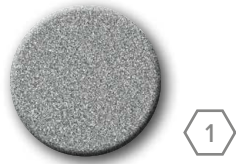

Bioglitter® is based on plants and is independently proven to biodegrade in natural, fresh water environments.

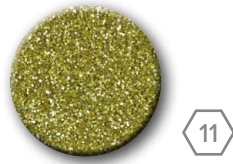

* Please refer to product information documentation for specific approvals for individual colors.
